

Spring Migration 1955

Compiled by

We have reports from 20 Saskatchewan observers (the two Saskatoon reports were amalgamated) and two from Alberta, to forward as our contribution to the American Co-operative Migration Study. There they will be compared to the reports from other states and provinces, in an effort to learn the effects of weather on migration.

Co-Operative Study

DR. STUART HOUSTON, Yorkton

It is most interesting to note that each migration wave this year seemed to pretty well cover the settled part of the province simultaneously.
