ADDENDUM — CARIBOU MOUNTAINS

In the article, "Additional Bird and Mammal Observations in the Caribou Mountains, Alberta", which appeared in the September 1976 issue of "The Blue Jay", pp. 176-177, the second sentence under the heading "Arctic Loon" p. 176 is incomplete. It should read: "I found a pair of these loons with *a youngster* in northeastern Alberta *about 160 miles* from Margaret Lake in 1971 (Hohn, *Can. Field Naturalist* 1972, 86: 372).

The italicized words were omitted in the printed text, which gives the erroneous impression that loons of this species had been found breeding in the Caribou Mountains. — *E. O. Hohn.*
