HOLIDAY PLACES AND ACTIVITIES
FROM THE
SASKATOON PUBLIC LIBRARY

Compiled by DIANE WEIR

In the list below there is reference to the "AV Department" and to the "Reference Department". Here is a brief description of these two components of many libraries. The Audio-visual Department lends both records and films (8 mm and 16 mm). Among the records in the Saskatoon Public Library are several of nature sounds, including the two Peterson albums of bird songs (west and east). Several of the films are on natural history. There are also catalogues of films available from other sources.

As will be noted in the list below, our Reference Department has some books that are not found in the Circulation Department. While Reference books can be used only in the library, we have listed two books from that Department both for your information and because they may be in the circulation departments of other libraries. (The call number would probably be similar with the "R" deleted.)

Our Reference Department also has a large selection of atlases and maps. Included are flat maps of countries and cities around the world (these may be borrowed) as well as topographical, geological and land use maps (which may not be borrowed). There are also several cabinets which contain the Tourist File. It includes booklets, road maps and other material on countries, provinces, states and cities, and these may be borrowed.

For boys and girls up to Grade 7, there are additional books on holiday places and activities in the Children's Department of the library.

ANGIER, Bradford. Wilderness cookery. 1963. Details on preparing game are combined with information on wild fruit and vegetables to make this a useful book for hunter, fisherman, camper, outdoor vacationist, and backyard barbecuer. 641.6 A588
