

rection slip for the two photos on page 478, where the captions have been reversed.

In view of the problem of locating place names, it seems unfortunate that the maps inside both front and back covers are identical. One might have been crammed with the more important place names and the other with ecological zones, lakes, rivers, etc. There may be a place-name error under Sharp-tailed Sparrow (p. 448): Cypress Lake is listed as being in central Saskatchewan and is not included in the species' breeding range.

What the shortcomings of the book are not serious is evident from the fact that I have personal copies at home and in the office and gave two Christmas presents. *J. B. Gollop, 2 York Ave., Saskatoon, Sask. S7J*

Canadian Sounds of Nature records: Songs of Spring — Warblers — Finches — Thrushes, Wrens and Mockingbirds — Prairie Spring — A Day in Algonquin Park each \$5.95.

NOTE: Saskatchewan residents add 5% Ed. Tax to purchases of any of the above items; reading material as follows is exempt from the tax.

BIRD BOOKS

A SECOND LOOK, by Liz Roley, 1976, 91 pp., paper, illus. b.w. drawings by Molly Lawrence, \$3.00. For 20 years Liz Roley has charmed and delighted readers of the Regina Leader-Post with her Nature Notes. The best of these have been gathered into a book so that many others can get the benefit of her perceptive and reverent eye. Mostly birds, but also many other aspects of nature around Regina and in the Qu'Appelle Valley, are captured for us less well-endowed folk.

TWO NEW PUBLICATIONS HAVE BEEN ISSUED BY S.N.H.S: No. 8 BLUE JAY INDEX 1961-1969 (Vols. 19 to 27) by Patricia O'Neil \$3.00; No. 9 BIRDS OF THE ROSETOWN-BIGGAR DISTRICT, SASKATCHEWAN by Wayne E. and Don H. Renaud \$4.00. Other S.N.H.S. Special Publications still in print are: No. 4 BLUE JAY INDEX 1942-1960 by Joyce Deutscher \$2.00; No. 5 BIRDS OF THE LAKE ATHABASCA REGION, SASKATCHEWAN by Robert Nero \$2.50; No. 6 BIRDS OF NORTHEASTERN SASKATCHEWAN by Robert Nero \$2.00; No. 7 BIRDS OF MOOSE MOUNTAIN, SASKATCHEWAN by Robert Nero and Ross Lein \$2.00.

THE BIRDS OF ALBERTA by W. Ray Salt and Jim R. Salt, 1976, 498 pp., 303 col. illus., 13 b.w. drawings, 288 maps, 5½ x 8½, \$10.00. A totally new book with an entirely new, updated and expanded text covering 329 species. Range maps include Saskatchewan and Alberta.

BIRDS OF CANADA by W. Earl Godfrey, 1966, 428 pp., 69 col. pl., 71 drawings, 2 maps, latest reprint \$17.50. This is a must for every North American birder as it describes every bird ever found in Canada up to 1966. The dust jacket photo is by Richard Fyfe. See the enthusiastic review by Dr. R. W. Nero in the *Blue Jay* March 1967, p. 39 — recommended.

THE BIRD WATCHER'S BIBLE by Geo. Laycock, 1976, paper, 7¾ x 10¼, illus. col. b.w., \$3.25. A comprehensive guide for birders, incl. attracting and observing birds, photography, equipment, ecology, vacation places for birding, where to find birds in all the States, etc.

BIRDS OF THE WEST COAST (Vol. 1) by J. Fenwick Lansdowne, 1976, 173 pp., 10½ x 14½, text by the artist. The long-awaited fourth book of Canada's outstanding bird artist contains 52 magnificent full-colour paintings and 53 of his sketches. \$40.00.

BREEDING BIRDS OF NORTH DAKOTA by Robert E. Stewart, 1975, cloth, 295 pp., 8½ x 11¼, illus. habitat photos in col., paintings of species by Roger T. Peterson

and Walter Weber, b.w. photos, 2 maps, species range maps. A tremendous amount of painstaking field work compilation have given us a complete picture of the distribution and abundance of N. Dak.'s breeding birds, \$18.50.

BIRDS OF CALIFORNIA by Arnold S. Rehn, 1974, 334 pp., over 300 b.w. photos (col.), cloth, \$12.50 US. An annotated checklist of over 500 species and a discussion of the birds of each of 25 habitats. Truly comprehensive and up-to-date on this popular place for vacation prairie people.

BIRDS OF ARIZONA by A. Phillip Marshall, G. Monson, 1964, 212 pp., 126 range maps, highlighted with 12 sketches by Geo. Miksch Sutton and photos in col. by Eliot Porter. Sutton and Porter provide that sumptuous touch. A fine guide to more than 400 species. Arizona is another mecca for vacation prairie people. \$17.50 US.

BIRDS OF THE WORLD by Oliver Austin, illus. Arthur Singer, 1961, 310 x 10 x 13¾, \$16.00. Long unavailable. This spectacular presentation of the families of the world is enriched with col. paintings, showing over 700 species. Among the best of its kind, we have a stock.

BENT'S LIFE HISTORIES OF NORTH AMERICAN BIRDS, Dover reprint, 10 vols. The complete set should be in every birder's library. Details on request.

CROWS OF THE WORLD by Goodwin, 352 pp., 3 col. pl., 114 drawings, 8¼ x 11¼, \$28.50 US. The diverse and successful group of corvids varies widely in colour, size and behaviour patterns. The author has had a rich personal experience with them and covers the general characteristics of the 116 species, a synopsis of the behaviour and biology of each.

HUMMINGBIRDS by Walter Scheithauer, 1967 Eng. trans. from Ger., 176 pp., illus. 76 magnificent col. pl., \$49.50. A connoisseur of these flying jewels, Scheithauer has kept them in captivity for study and photography. His work has solved many problems and his color photographs have to be seen to be believed. Long out of print, we have one copy.

PRAIRIE BIRDS IN COLOR by Deane Gilroy, 1976, 116 pp., 8½ x 9, 154 photos, \$9.95 paper, \$14.95 cloth. A greatly expanded version of the author's "An Album of Prairie Birds", this book contains beautiful colour photos of 92 birds. Each picture is accompanied by brief description of the bird, its habits and habits, and details of the photo method. A true

OTHER NATURAL HISTORY BOOKS

WILDFLOWERS ACROSS THE PRAIRIES by
Anton Vance, James Jowsey and James
McLean, 216 pp., 422 col. pl., 200 drawings,
softcover \$8.95. Promised for Feb. 1977, we
have all been looking forward to this
book.

THE CARNIVOROUS PLANTS by F. E.
Coyd, 1942 (1976 Dover reprint), 352 pp. il-
lus. b.w. drawings, \$5.25. Only increasing
reputation since its first appearance in
1942, this book is the definitive study of
the plants which capture and digest animal
prey. This thorough and scholarly work
covers 450 species.

THE EXPERT WITH MAP & COMPASS by
Loren Kjellstrom, 1976, 214 pp., profusely
illus., \$8.25 (incl. kit with practice compass,
etc.). The complete orienteering hand-
book appears in a new enlarged edition.
The sport of orienteering is just the thing
for outdoors groups looking for a new
hobby.

ORIENTEERING by John Disley, 170 pp.,
167, profusely illus., paper \$3.95. The
popular European sport of orienteering is
growing in this country. A walking road rally
that requires compass and map, it provides
something for everybody. An ideal out-
doors sport for natural history groups.
There are five titles in the growing number

of books describing the wild food
available free all around us:
THE EDIBLE WILD by Berglund & Bolsby,
1974, 188 pp., illus., paper, \$3.50.
EDIBLE & USEFUL WILD PLANTS OF U.S. &
CANADA, C. F. Saunders, paper, \$3.50.
FEASTING FREE ON WILD EDIBLES by Brad
Angier, 288 pp., illus. paper, \$4.95.
FIELD GUIDE TO EDIBLE WILD PLANTS by
B. Angier, 255 pp. col., paper \$4.95.
WILDERNESS SURVIVAL by B. Berglund,
for eastern forests, paper \$3.95.

THE LAST REFUGE by J. G. Nelson, 1973,
230 pp., cloth, \$8.50. An ecological history
of the northern plains, 1750-1885.
Emphasizes the landscape change and
lasting, destructive effects on wildlife and
Indians of our economy: fur trade, mining,
ranching, farming, and the railroad. The
last refuge is the Cypress Hills.

FLUCTUATIONS IN THE NUMBERS OF
THE VARYING HARE by D. A. MacLulich,
1937, (reprinted), cloth, \$9.50. Mam-
malogists will be glad to know that this
classical work is again available.

The above are just a few of the hundreds
of natural history titles we have in stock or
are available from the publishers. Your in-
quiries are invited, but please specify your
field of interest. REMEMBER: S.N.H.S.
